

A C K N O W L E D G E M E N T S

I would like to thank the many people who have been writing from around the world. It is encouraging to know that there are so many people who are interested in uncovering the truth. I have also special thanks for so many providing valuable insight into trends around the world from China, Soviet Republics, South Africa, Brazil, Australian, and India. I believe we can survive the folly of governments even if they refuse to listen. The key is understanding the nature of events, and that allows us to correctly make the decision to be on the opposite side.

I would like to also thank all my old friend and former clients for their support and to know that they have continued to gather information that serves us all in times of crisis.

We are standing on the precipice of a new era in global-social-economics. How we enter this new age is of critical importance. Government is incapable to doing anything for any reform of its own abuse of power is not up for negotiation. We must weather the storm, and to do so we need to understand its nature. Just as the 1930s Great Depression set in motion profound changes that were even manifest in geopolitical confrontations, we have now reached such a crossroads. A debt crisis has its tentacles deeply embedded into every sector right into government. This is the distinction from a mere stock market crash that never alters the economy long-term. We are seriously still over-leveraged and some banks are still trying to be hedge funds and have to speculate to make a profit. That is a key warning sign that the worse is yet to come.

This Report may be forwarded as you like without charge to individuals or governments around the world. It is provided as a Public Service at this time without cost because of the critical facts that we now faced economically. The contents and designs of the systems are in fact copyrighted. At a future date, a new edition of the 1986 The Greatest Bull Market In History will be released and a new book will soon be published on the model itself - The Geometry of Time. It is vital that we do not forget this is a world economy and the arrogance that any nation can dictate to the world is just insanity. Every nation effects all others no different than if one nation were to pour all its toxic waste into the ocean. Everything is interlinked and solutions are never isolated events.
